MISCELLANEOUS.

TWENTY YEARS AGO

Physicians sent their throat and lung patients toward the tropics. Now they send them northward—to the mountains up among the pines. Sufferers from throat and lung troubles experience a wonderful sense of relief in the fragrant atmosphere of a pine country.

Santa Abie

Is prepared from Abietine Balsam, obtained from a rare species of pine found only in California and Norway, and from Verba Santa, better known as Mountain Balm. Soothing, healing and restorative, Santa Abie is a matchless remedy for coughs, colds, croup, asthma, bronchitis and all other diseases of like character. Easy to take, quick in its effects. Every bottle guaranteed.

FOR SALE BY
S. J. HODGKINSON.

CHARLES E. CLOUGH,

BUILDER, ARCHITECT

—AND CONTRACTOR.

—RENO, NEVADA.

Plans for buildings and estimates of cost furnished. Contracts taken for any size or style building. Builders take the University. Orders left at Standard shoe store will receive prompt attention.

Periodicals as a Cure for Cholera.

The experiments now being made with crystals of periodate and periodate of iron for the treatment of cholera cases in the barracks of Hamburg have resulted in a remarkable falling off in the death rate at these barracks as compared with other hospitals in that city. Dr. Wever, who was the first to use the periodate, claims that this method is simply an application of the principles of sanitation to the body, and that it is at once preventive and curative as a system of physical disinfection and cleansing. The periodate appears to kill the disease germs instantly, yet it is perfectly harmless to the human system, even when introduced in large quantities.

The periodate of iron has been used in cases in which an unusually strong nerve or heart stimulant has been deemed necessary, or for severe neurologic symptoms. The powdered crystals have been used to disinfect the alimentary canal and as a water solution to wash out the stomach in cases of severe vomiting. They have been employed also for transfusions under the skin or into a vein in order to restore suspended circulation of the blood. In a case of collapse the patient has been given drafts of periodate sufficient to restore the pulse and cause the heart beats to return.—London Times.

Negroes in Washington. There are 2,304 negroes employed in Washington by the government, and they draw from the treasury in salaries about \$2,000,000 a year. Naturally the defect of the Republican party was a severe blow to them, for, being Republicans themselves, they expect to be removed by the Cleveland administration in so far as they are not protected by the civil service rules. A large number of them, however, may be happily disappointed, although men like ex-Senator Bruce, who receives \$18,000 a year as recorder of deeds in the District of Columbia, are very likely to be accelerated into private life.

In all there are between 75,000 and 80,000 negroes who live at the national capital, and their accumulation of wealth is now very large. Among them, too, are many of the best educated young men of the race, who ought to be scattered among their people in the south helping to elevate the general condition of the negroes.—Springfield Republican.

The Shape of Sea Fowls' Eggs.

Sea fowls' eggs have one remarkable peculiarity. They are nearly conical in form, broad at the base and sharp at the point, so that they will only roll in a circle. They are laid on the bare ledges of high rocks, from which they would almost surely roll off save for this happy provision of nature.—Boston Transcript.

A Sharp Bargain.

A valuable diamond, which Hal Carpenter, of Columbia county, N. Y., wears in his shirt bosom, was purchased by him years ago in the Orinoco river region in South America for two boot legs of plug tobacco, which the natives valued more highly than gems.—Chicago Herald.

The Prickly Pear.

The prickly pear of Africa is so tenacious of life that a leaf, or even a small portion of a leaf, if thrown on the ground, strikes root and sprouts almost immediately and becomes the parent of a fast growing plant.

The search for the golden fleece had not for its sole object the conquest of a mine, or a precious stone, or to rob the treasure so carefully hoarded by the avaricious Aetes.

Champagne owes its quality to the soil, a mixture of chalk, silica, light clay and oxide of iron, and to the great care and delicate manipulation in manufacture.

Honesty is the Best Policy.

HOW MANY deaths have been the result of treating with unscrupulous demagogues.

How many deaths have been caused by the use of poison (morphine, acconite, strychnine, belladonna, etc.)

In how many cases has death been hastened by the use of mineral (mercury, iron, zinc, chloral).

In how many cases have men and women been ruined for life by the use of the ever ready knife, at the hands of a so-called Specialist.

How many people there are who go from doctor to doctor and from hospital to hospital, suffering from a complication of diseases, and being treated for first one thing and then another, and never realizing the least benefit.

Never in any case having received anything but a combination of mineral poison, and as a consequence, accelerated misery and distress.

To such the discovery of a doctor who understands his or her case, who applies a common sense treatment and relieves the sufferer from pain and distress by Nature's remedies, is like a flash of heavenly light from a dark and overcast sky.

Cleanliness is Next to Godliness.

Disease means a deposit of irritating dirt. Chronic disease a deposit of accumulated dirt. Wash the system as you would the most delicate piece of soiled lace. By the aid of vegetables, tonics and botanic treatment, and a cure is effected.

If you have been abusing yourself for years by being irregular in your habits of living, eating, drinking and sleeping, over-indulgence in tobacco or liquor, we will rectify your whole system and make you natural and healthy.

A sound body makes a clean mind. Take advantage of our prescribe. Consultation free to all. Our charges for treatment are peculiarly moderate. The poor treated free of charge.

A. A. CHISHOLM, M. D.

Parlor 8, Occidental Hotel.

Dr. CHISHOLM treats chronic and private diseases, with success, having made a specialty of them for years. Facilities all the latest modern apparatus, invited to take advantage of the Doctor's visit. Consultation free and confidential.

Catarrh Cured, \$10 Per Month.

Have you much dropping from the head into the throat, loss of smell, hearing, a fast, full headache and digestive stomach, harking cough

and general debility. Catarrh in the cause. Dr. Chisholm positively cures catarrh of the head, as well as of the stomach and catarrh of the bladder, a form of Bright's disease of the liver.

In your liver, stomach and bowels? Are your eyes a yellow color, or 3 or 4 skin yellow and discolored, periodical headache, backache and finally epilepsy? Cure them in 10 days and avoid premature debility, loss of vitality and misery.

Dr. Chisholm's are all vegetable in form and give constitution strength and vitality. Call on us early and be benefited.

NEWSPAPER ARCHIVE

FEDERAL APPOINTMENTS.

It was stated in the JOURNAL some time ago that President Cleveland did not believe in encouraging the business of professional office seeking and would not appoint men to Federal positions who held office under him four years ago. He said that when he retired from the White House he thought no more of office and engaged in the practice of his profession. A dispatch in yesterday's JOURNAL confirmed what had been previously stated in its columns. The President informed Congressman Springer of Illinois that the rule laid down by him of not appointing men who held office under him before was inflexible and will even be adhered to in the appointment of fourth-class postmasters so far as is possible.

The statement too, that there would be no appointments made till the terms of the incumbents expired, except in a few cases of offensive partisanship, is also confirmed by Senator White of California, who had a talk with the President on the subject. Office holders, Senator White says, will not be disturbed to make places, and it will be nearly a year in any case before the President can reach the California patronage.

The determination of the President to appoint no person to office who served under his first administration has a depressing effect on the ex-Federal officials in Colorado, Idaho and Nevada, while the announcement that none of the officials appointed by President Harrison would be removed, except for cause, until the expiration of their terms, has raised the spirits of the present Federal Brigade. The "outs" are not so enthusiastic for Mr. Cleveland as they were, and the "ins" do not think he is such a bad man as they represented him to be during the campaign.

SILVER MEN IN THE ASCENDANCY.

The Democratic Senators are holding a caucus in Washington to arrange the standing committees of the Senate. A majority of them are silver men and they are determined to control the Committee on Finance. Mr. Sherman of New Jersey, the only golding Democrat now on the committee, will be made Chairman of the Committee on Naval Affairs and a free coinage man put in his place. The committee consists of eleven Senators—six Republicans and five Democrats. As organized it will consist of six Democrats and five Republicans. All the Democrats will be free coinage men. This with Senator Jones of Nevada will make the committee seven to four on the silver question and insure a favorable report on all coinage bills that may be referred to it.

Sherman of Ohio has been a member of the Committee on Finance for years and will doubtless continue to be. For the first time he will have to contend with a majority opposed to his financial views and he confronted with a report of the committee in favor of according to silver the same privileges given gold at the mints of the United States.

SHARP PRACTICE.

The Legislature passed a bill to reduce the salaries of deputies in the several State offices from \$2,000 to \$1,600 a year. The Act was to take effect January 1st, 1894. The Governor declines, and no one questions the statement, that the bill did not reach his office, and it is alleged that it had not been enrolled. The minutes which gave a record of the bill also disappeared but they had been copied so that the action taken on the bill is recorded. The Journals of the two Houses show that it passed, and it is said the original bill was enrolled, attested by the proper officers and signed by the Governor, after the enrolled bill was missed.

That the bill was stolen there is hardly room for doubt and that the theft was committed by some one of the persons interested can scarcely be disputed. Under the circumstances the Governor ought to exercise the whole power of the executive to ascertain who stole the bill. He should offer as liberal a reward as the appropriation for that purpose will admit of for the conviction of the person or persons implicated. The State cannot afford to let the matter pass unnoticed. The guilty parties should be hunted down, if possible, and punished.

AN ELECTRIC TANNERY.

In 1893 over one million pounds of leather was tanned in France by electricity; in Portugal 1,400,000 pounds was tanned by the same process and there is a tannery in Brazil that has a capacity of 140,000,000 pounds per annum. It is claimed that as good leather can be made in four days by this process as could be produced in ten or twelve months in the old way. The cost of a plant for 1,500,000 pounds per annum is about \$8,000.

The Reno Electric Light and Power Company ought to look in to this matter. A tannery ought to pay here as there are hides enough shipped out of the State to supply one with the raw material.

Geographically Cleveland's new Cabinet is distributed precisely the same as his first. There are two members from New York State, two from New England, three from the West and three from the South. Four of the members, namely, Bissell, Olney, Smith and Lamont, are directors of either banks or railways or both. There is not a Wana maker, that is a millionaire, among them, in fact all are comparatively poor men.

TELEGRAPHIC NEWS

Matters of Interest From Home and Abroad.

A BIG FIRE IN BOSTON.

An Analysis of the Work of the Fifty-Second Congress.

A YOUNG BRIDE COMMITS SUICIDE

The Work of the Fifty-Second Congress.

WASHINGTON, March 10.—Henderson of Iowa, for eight years a member of the House Committee on Appropriations, presents an analysis of the work of the Fifty-second Congress. He gives the total appropriations, including permanent appropriations at \$1,026,822,000, exceeding the Fifty-first Congress by \$38,404,866, an increase of \$115,767 for each Congressional District in the United States. He asserts in addition to appropriations actually made by the Fifty-second Congress, it authorized contracts, mortgaging future revenues in the sum of \$58,526,262.

He says if the Fifty-second Congress seeks to excuse itself by charging its extravagance to legislation to the Fifty-first Congress, then the latter Congress can make the same claim against its Democratic predecessors.

To guard against a deficit, Henderson warns the Administration to give closer attention to "moonshiners" and the "whisky ring" in collating internal revenues than it did from 1885 to 1889, when it collected \$51,090,682 less than President Arthur, and \$115,358,342 less than President Harrison.

He says the retiring Administration paid \$295,317,931 on the public debt, saving an interest annually \$65,352,493 annually.

Henderson refers to the defeat of the Bankrupt bill in the House, the Special Pure Food bill, the slaughter of the Anti-Option bill, its inability to grapple with the money question, its silent admiration for the McKinley bill and predicts that the Fifty-second Congress will go down to history as the "know-nothing" and the "do-nothing" Congress.

The Hawaiian Treaty.

WASHINGTON, March 10.—The President withdrawing the Hawaiian treaty is still a matter of discussion among Senators. A Republican Senator said to-day that he received an intimation that the President desired to modify the treaty and that it would undoubtedly be returned to the Senate. The Senator thought it was possible that he might so frame a treaty that annexation would depend upon all the Hawaiian as expressed by Prebische. Should the majority reject annexation, then a protective tariff might be established and this in turn would result in annexation because the United States could not undertake to permanently assume responsibility for the acts of the islands without power to control those acts. The treaty was ambiguous respecting sugar bounties.

The Interview between Secretary Greenham and Tourist and Castle of the Hawaiian Commissioners this afternoon was brief.

The Secretary intimated that he might desire some information from them regarding the situation in Hawaii.

A Destructive Fire.

Boston, March 10.—A fire broke out at 4 P. M. in a building owned by F. L. Ames on the corner of Essex and Lincoln streets. It spread to Horace Partridge's building and is spreading in the direction of the Boston and Albany depot. A general alarm was rung in. It is reported that twenty-five lives have been lost. The Ames building was occupied by the Woonsocket Rubber Company and many other firms. It is stated that many occupants of the building were obliged to leap from their rooms.

The intense heat in the vicinity of the fire caused the abandonment of several engines. Aid was called for and received from Cambridge, Somerville and other suburban cities.

The fire was under control at 8 o'clock. The burned district comprises practically one whole block.

Buffalo Wants It.

BUFFALO, March 10.—The scheme to secure the great Corbett-Mitchell contest for Buffalo has taken a tangible form and a provisional lease of the big exposition building, which will seat 20,000 people, has been secured.

A meeting of those interested in the affair will be held to-morrow, when it is likely that certain propositions will be submitted to the Buffalo Athletic Club to have the contest come off under its auspices. If this club refuses to accept the responsibility, the old Erie County Athletic Club may be revived for the purpose. The scheme to bring the contest here has taken firm hold and guarantees of funds sufficient to outbid other competitors are already assured. Whether the authorities would permit the contest is another question, but so far little opposition has been evinced.

The First Postmaster.

WASHINGTON, March 10.—Secretary Morton appointed Donald McCausland of Nebraska City, N.B., Chief Clerk of the Agricultural Department, Vice Henry Cassman resigned.

More Gold Offered.

WASHINGTON, March 10.—Secretary Carlisle has received offers from Chicago bankers to exchange three millions in gold for a like amount of small treasury notes, with intimations that probably ten millions will be wanted on the same terms. Carlisle will forward all of the notes at once. The treasury has no advice of intended gold shipments on Saturday.

Several other offers of gold in exchange for small treasury notes were made to Secretary Carlisle this afternoon. The Cincinnati banks offered \$1,000,000, of which \$800,000 was accepted. Other offers in small quantities come from bankers in Kentucky, Illinois and Missouri. Treasurer Nebraska is much pleased with the two offers have taken and declared that sufficient offers of gold have been received to absorb all small notes in hand.

Suicide of a Bride.

SALT LAKE, March 10.—At Ogden Wednesday night Joseph F. Jones of Pocatello, Idaho, married Laura May Little of San Francisco. This morning while the newly wedded man went down to the hotel office the bride shot herself through the breast three times. She was found in her last gasp, with nothing on but her night clothes. No reason is known, but insanity is conjectured. Their parents were first cousins and their families had intermarried for six generations.

Doubtless a Fake.

NEW YORK, March 10.—Warren Lewis admitted this morning that he suggested to Fitzsimmons on the day that the articles for the fight with Hall were signed that the purse be split and that the fight be had on the level. He virtually confirmed the charges made by Fitzsimmons in the dispatch from New Orleans. Lewis said that the suggestion was made in a general talk and that he had not made it as coming from Hall.

Sale of Mining Property.

PHOENIX, A. T., March 10.—A. J. Porter, a miner and assayer of this city, to-day sold a copper mine located in Eagle Tail mountains for \$150,000. Less than ten tons have been taken out of the mine, but this ran \$30 in gold and silver besides copper, which is of very high grade. The purchaser was the Olanes Belt Canal Company, which is constructing an immense canal in the same same vicinity.

Hawkins Discharged.

SAN FRANCISCO, March 10.—Police Judge Conlan to-day dismissed the charge of manslaughter against prize fighter Dai Hawkins and his second, Hawkins was arrested for causing the death of Billy Miller in a fight at the Pacific Athletic Club.

Shot to Death.

CANON, I. T., March 10.—At noon to-day Sheriff Johnson of the Choctaw Nation shot to death Eliza Loring for killing an aged Indian woman, who, he said, was bewitching him, in accordance with the sentence passed upon him by Judge Hampton.

A Heavy Storm.

DUNSMUIR, Cal., March 10.—For twenty hours it has been snowing fast and tonight it is falling faster. A strong south wind is blowing and many buildings will be in danger before morning.

Weather Forecast.

SAN FRANCISCO, March 10.—The forecast for Nevada is occasional rain or snow and warmer in the northern portion.

Meeting His Ideal.

"It is always said," remarked Scott Herdine to the corridor man, "that a man's ideal does not exist on this terrestrial ball; that always it is ethereal, evanescent, and can never be described nor painted. I am a painter—not by trade, but by choice—and I really think that I have not only painted my ideal woman, but I have still found her. For a long time I studied over what beauty is in woman and endeavored to visualize my ideal. I partly succeeded in this, for later I painted what I considered the most beautiful woman, measured, of course, by the standard of my own inclinations and choice. Then I fell to adorning my work and dreamed of some day meeting my ideal. About five years ago I traveled in Switzerland, sketching the glorious Alpine scenery, the natives and the pretty women.

"One afternoon I journeyed, or rather pilgrimaged, to a rich old burgher's country seat, about seventeen leagues from Lucerne, to sketch and to visit the graves of some of Switzerland's fallen heroes. While there I met the owner, a stern old Roman Catholic, who could fluently speak French. He introduced me to his daughter, the fair Emily, in whom I found a majority of the characteristics of my ideal. I had almost painted her correctly. While there I studied her face closely, so as to be able to catch the fleeting expressions and the sentiment that I knew my picture lacked. Then I returned home and touched again the face with my brush. After making a very little change I found that the picture was a splendid likeness, and I accordingly presented it to the family."—St. Louis Globe-Democrat.

Two Stepping Stones

to consumption are ailments we often deem trivial—a cold and a cough. Consumption thus acquired is rightly termed "Consumption from neglect."

Scott's Emulsion

not only stops a cold but it is remarkably successful where the cough has become deep seated.

Scott's Emulsion is the richest of fat-foods yet the easiest fat-food to take. It arrests waste and builds up healthy flesh.

Prepared by Scott & Bown, N. Y. All druggists.

Women and Dogs, Etc.

In the late Montagu Williams' book, "Around London," there is a striking testimony to the truth of an old saying concerning women. "If any one," said Mr. Williams, "has doubts as to the brutalities practiced on women by men, let him visit the London hospital on a Saturday night. Very terrible sights will meet his eye. Sometimes as many as twelve or fourteen women may be seen seated in the receiving room waiting for their bruised and bleeding faces and bodies to be attended to. In nine cases out of ten the injuries have been inflicted by brutal husbands. The nurses tell me, however, that any remarks they may make reflecting on the aggressors are received with great indignation by the wretched sufferers. They positively will not hear a single word against the cowardly ruffians.

"Sometimes," said a nurse to me, when I have told a woman that her husband is a brute, she has drawn herself up and replied: 'You mind your own business, miss. We find the rates and taxes, and the likes of you are paid out of 'em to wait on us.'"

Lecturing to Royal Children.

Of the first lesson given to the royal children Mr. Hart says that when the professor (Sir Richard Owen) first arrived at Windsor castle he inquired where he should hang up his diagrams, as these lectures were to be given in the white drawing room, the walls of which were covered with white satin. The answer was that he was to do exactly as he pleased. The gentleman in waiting was therefore of opinion that he should pin the drawings upon the white satin hangings, but this the professor declined to do, and thereupon requested to be led to the laundry of the castle, to the blank amazement of the official. When he arrived there he picked out the largest clotheshorse he could find, and, having procured some green baize, rigged up an impromptu stand, which showed off his diagrams to the best advantage.—London Globe.

Mexican Telegraphs and Railroads.

In the republic of Mexico there are now about 22,000 miles of telegraph lines in operation, including the new lines constructed since last April. There are now over 6,000 miles of railroad in Mexico, about 121 miles having been constructed since last April.

For Bronchitis

"I never realized the good of a medicine so much as I have in the last few months, during which time I have suffered intensely from pneumonia, followed by bronchitis. After trying various remedies without benefit, I began the use of Ayer's Cherry Pectoral, and the effect has been marvelous, a single dose relieving me of choking, and securing a good night's rest."—T. A. Higginbotham, Gen. Store, Long Mountain, Va.

La Grippe

"La Grippe I was taken down with a gripe. At times I was completely prostrated, and so difficult was my breathing that my breath seemed as if confined in an iron cage. I procured a bottle of Ayer's Cherry Pectoral, and no sooner had I begun taking it than relief followed. I could not believe that the effect would be so rapid."—W. H. Williams, Cook City, S. Dak.

Lung Trouble

"For more than twenty-five years, I was a sufferer from lung trouble, attended with coughing so severe at times as to cause hemorrhage, the paroxysms frequently lasting three or four hours. I was induced to try Ayer's Cherry Pectoral, and after taking four bottles, was thoroughly cured. I can confidently recommend this medicine."—Franz Hofmann, Clay Center, Kans.

AYER'S Cherry Pectoral

Prepared by Dr. J. C. Ayer & Co., Lowell, Mass. Sold by all Druggists. Price \$1; six bottles, \$5. Prompt to act, sure to cure.

NEW TO-DAY.

BANK NOTICE.

COMMENCING MARCH 11, 1893, THE FIRST NATIONAL BANK OF RENO, Nev., will make no charge to its customers for exchange on Sacramento and San Francisco. Commencing April 1, 1893, the Bank will issue time certificates of deposit bearing interest at the rate of 4 per cent, per annum.

CLAS T. BENDER, Cashier.

RENO, N. Vada, Mar. 10, 1893.

Pigs for Sale.

Twenty head of pigs for sale, weight from 25 to 50 pounds. Inquire at Iron Bridge Stable. m11

FRESH GARDEN SEEDS

HODCKINSON'S DRUGGIST.

CASH PRICES

BREVITIES

Paints at Lange & Schmitt's.
Dr. Porter fills teeth without pain.
"Othello" at the Opera House to-night.
There is not a mill running on the Carson river.

The Supreme Court will be in session at Carson to-day.

Twenty head of pigs for sale. See ad. in another column.

Senator Rieky of Ormsby left for San Francisco last night.

Assemblymen Fouke and Norcross left for California last night.

Crockery and glassware at San Francisco prices at Lange & Schmitt's.

Three men were drafted from the V. & T. shops at Carson Thursday.

Messia's French Female Pills for irregular menses, sold by McCullough.

Samuel C. Cousins of Toronto, Canada, claims to be the long lost Charlie Rose.

D. A. Bender of Carson arrived in Reno yesterday and remained over last night.

Dr. Porter extracts teeth without pain. Office, Steele building, Commercial Row.

Plumbing, tinning and pipe work done at the lowest possible prices by Lange & Schmitt.

Aged people find in Ayer's Sarsaparilla just the tonic they need. It helps them wonderfully.

Captain Warner, Indian Agent at Pyramid, has so far recovered from his recent illness as to be able to visit Reno.

Larry Davis of Eureka, Assistant Secretary of the Senate, after spending a day in Reno, departed yesterday for his home.

Any one troubled at night with a persistent cough can procure much-needed rest by taking a dose of Ayer's Cherry Pectoral.

The tax levy in Storey county for the present year has been fixed at \$4.35 on the \$100 valuation. This is 55 cents more than the levy last year.

Hon. J. M. Sanford, Treasurer of Churchill county, arrived in Reno yesterday. He says there is not many better left on the Snake of Carson.

Do not forget the concert at the Baptist Church this evening. Two of the best female singers in the United States will sing some choice selections.

If you want a reliable dye that will color an even brown or black, and will please and satisfy you every time, use Buckingham's Dye for the Whiskers.

Joe McGroes stole an overcoat belonging to George Lingo, a cattleman, Thursday and yesterday Justice Linn gave McGroes fifty days in the Hotel de Caughlins to repent.

A house was struck by lightning at Boon, Iowa, the other day and completely demolished, and yet a woman and three children sleeping in the building were not even shocked.

If you wish to enjoy a treat in theatrical performance go to the Opera House to-night. "Othello," Shakespeare's tragedy of love, hatred and jealousy will be produced by the Foots Company.

The Eiko Independent says reports from all parts of the country are to the effect that there is plenty of snow in the mountains, and that the outlook for plenty of water in the coming season is exceptionally good.

The case of Jack vs. Thompson has been continued in the District Court until Monday to give the Court an opportunity to dispose of other business. It is said to involve business amounting to over \$2,000,000 and extending over a period of a dozen years.

The Banker Hill mill at Calena, Lander county is to be removed to Central District, Humboldt county, to work over at the Blackbird mine recently purchased by an eastern company. Ex-Sheriff Fellows of Humboldt is superintending the removal of the mill.

Charles F. Kidd, alias Frank M. Rogers, while express agent at Collinston, Utah, ordered over \$2,000 worth of diamonds from a Denver firm to be sent O. D., and when the gems arrived he took them and left. He has been captured at Lansing, Michigan.

The Baptist Church should be filled to its utmost capacity this evening. The best musical talent in the country, Miss d'Arville and Miss Finlayson of the Bostonians, will treat the audience with choice musical selections. Both young ladies have a national reputation, and beside Miss Finlayson is a Reno girl and a crowded house should greet her. The concert is for the building fund of the Congregational Church.

The First National Bank, by its cashier Chas. T. Bender, announces that no charge will be made to its customers for exchange for exchange on Sacramento and San Francisco. It was also announced that on and after April 1st the bank will issue time certificates of deposit bearing interest at the rate of 4 per cent. per annum. These are new departures in the banking business in Nevada that will be appreciated by the public.

Senator Martin of Kansas has been given a seat in the United States Senate, though it is alleged that his election is irregular. The R-republican Senators have denounced to consider his case and it was decided that the question of contesting his election must be determined by the R-republicans of Kansas. If they insist on an investigation the Republicans in the Senate will make an inquiry, otherwise Martin will be permitted to retain his seat uncollected.

NEW LAWS.

An Act to Provide for the Management of the State Agricultural Society.

Approved February 11, 1893.

SECTION 1. Section three of said Act is hereby amended so as to read as follows:

Section three. Within ten days after their appointment, the persons so appointed shall qualify as required by the Constitution, and shall meet at the office of the State Agricultural Society, and organize by the election of one of their number as President, and one as Vice President of the Board and [sic] said Society, who shall hold said offices (if President and Vice President for the term of one year and until their successors are elected and qualified. The Board shall also elect a Secretary and Treasurer, out of their number, who shall hold office at the discretion of the Board.

Sec. 2. Section four of said Act is hereby amended to read as follows:

Section four. At the same meeting the members of the Board shall, by lot or otherwise, classify themselves into four classes of three members each. The terms of office of the first class shall expire at the end of the first year; of the second class, of the second year; of the third class, of the third year; of the fourth class, at the end of the full term of four years. The final year shall be from the first of December to the first of December.

An Act Fixing Salaries of Senators and Assemblymen.

Approved March 2, 1893.

SECTION 1. Section 7 of an Act entitled "An Act reducing and regulating the salaries and compensation of certain State officers and attaches of the State Government of Nevada," approved February 21, 1891, is hereby amended to read as follows:

Section seven. To State Senators and members of the Assembly, eight dollars per day for each day of session, provided the total amount so paid shall not exceed the sum of four hundred dollars at any regular session, and fifteen cents per mile for each mile actually traveled in going to and returning from the place of meeting, which said mileage shall, however, be computed in all cases, upon the shortest route, if there be two or more routes, to the said place of meeting; provided, that each member may be allowed not exceeding twenty dollars for the purchase of newspapers and stationery during each session.

An Act Concerning the Payment of Debts and Other Obligations.

Approved February 15, 1893.

SECTION 1. On and after the passage of this Act, all official bonds and undertakings, and also all obligations of debt, judgments or extensions stated in terms of dollars and to be paid in money shall be payable, all stipulations in the contract to the contrary notwithstanding, in either the standard silver or gold coins and other legal money authorized by the Congress of the United States.

An Act to Regulate Proceedings in Justice Courts.

Approved February 11, 1893.

SECTION 1. That section five hundred and eighty-eight of said Act be amended to read as follows:

Section five hundred and eighty-eight. Justices of the Peace may require of the plaintiff a deposit of money or an undertaking as security for all costs before issuing a summons.

WEATHER FORECASTS.

A Dangerous Storm Coming—Stages of the Heavily Boded.

Copyrighted 1893 by W. V. Foster.

St. Joseph, Mo., March 10, 1893.

My last bulletin gave forecasts of the storm waves to cross the continent from 12th to 16th, and the next will reach the Pacific coast about the 17th, cross the western mountains by close of the 18th, the great central valleys from 19th to 21st and the Eastern States about the 22d.

This will be a dangerous and destructive storm and will develop tornadoes in the great central valleys. The storm will probably begin to increase in force soon after leaving the Pacific coast and will continue with great energy till it has passed off onto the Atlantic. The center of this path will lie, and the tornadoes will probably occur, south of the 40th parallel. The early being at its apex at the time is not the principal cause assigned for this disturbance.

The cool wave will cross the western mountains about the 20th, the great central valleys about the 22d and the Eastern States about the 24th. The last ten days of March will average colder than usual. On the front and rear of the cool waves of March the weather will be more cloudy than usual, with frequent showers and snows, according to latitude of places.

THE AZOIC AGE.

It will now be understood by the careful reader of those discussions that I believe in a theory that will not conflict with the known facts in reference to the laws and matter of the universe now known to exist. The true theory, to my mind, is that meteors, comets, planets and suns have a common origin, are governed by the same natural laws and that their only material difference is in their size, shape, electric power and surrounding circumstances. They follow the same process in evolution that does the animal kingdom, the meteor before striking our atmosphere being one of the many millions of young planets.

We have the five stages of man: the infant, youth, manhood, middle age and dotage. So we have the five stages of the heavenly bodies: the meteor, comet, satellite, planet and sun. What we call a meteor is the death of a youthful comet; it is destroyed by entering our atmosphere. Comets are sometimes destroyed. We have over 300 small planets, formerly called asteroids, but now properly called planetoids, which have been comets but have lost their elongated orbits by coming in contact with Jupiter and have, therefore, become planets before they were fairly ripe. They would have grown more rapidly by continuing their journeys far out into space as the comets usually do.

For the above reasons I must conclude that the earth became a very large comet

before it broke away from its original elongated comet orbit and that its perihelion was originally very near the sun as we know to be the case now with some of the great comets.

The perihelion passages of our earth, when a comet, will account for the arched rocks, also called azoic. These rocks constitute the base or foundation of the stratified rocks. If the arched had been formed by a molten globe they would not be stratified but run together like a crucible of melted lead and would not be in layers. But all our geologists say that the arched rocks are stratified. That fact knocks the last prop from under the molten world theory and proves that the heat which caused the universal igneous rocks, which we call azoic or archean, came from without and, therefore, must have been caused by the earth-comet going very near the sun at its perihelion passage.

PROOF OF THE THEORY.

Another almost positive proof of this theory is that no fossils are found in the azoic rocks, and therefore no animal or vegetable life existed on our earth comet. This is in accord with natural laws. While it was a comet our earth probably passed out into space so far that such eyes as we possess could not have seen the sun from the earth-comet, and such a condition would not be favorable to animal or vegetable life. At perihelion all life must be destroyed by heat and at aphelion by cold. Not by radiated heat but by friction against the sun's deep and dense electro-sphere and atmosphere.

As our earth-comet shortened the elongation of its orbit, as it is still doing, its aphelion came nearer and its perihelion farther from the sun. This would cause a more even temperature and permit the waters to remain in their ocean beds. At perihelion the waters of the old earth comet would be evaporated and driven out into the envelope and the minerals would all be evaporated into heavy gases. At aphelion these would all condense and fall to the body or coma of the earth-comet. This appears to be the process now going on in all the great comets.

As the earth-comet passed to aphelion the waters would fall and fill up the ocean beds in which the drift or earthly settlements would form layers or strata at every aphelion of the earth-comet, and hence the universality of the stratified rocks in the azoic period. Study the great comets known to our time and you will find indisputable proof that my theory is the true one.

CHANGES IN THE EARTH.

How many great changes have come upon the earth is not known. The geological record starts at the azoic rocks where no life existed. Low forms of life existed in what is called the lower silurian at the end of which most of these forms became extinct. A new set of life forms appeared in the upper silurian at the end of which those forms perished. Then came the devonian age and the shell fishes. The carboniferous age produced sea animals and two other periods of great changes occurred before man came upon the scene according to geological record. According to that record the first dry land appeared in the devonian age which immediately preceded the carboniferous.

The record of the first dry land is a positive evidence in line with my theory of the earth's evolution. At the close of the devonian age our moon-comet struck the earth and changed its axis of rotation, consequently the ocean now cover what was then the continents and where the continents now are were then the oceans. That is the reason why the fossils of man are not now found on the present continents. His former abodes are now covered by the sea oceans and if we could go below the bottoms of the great oceans we certainly would find fossils of man that would prove that he occupied the earth as far back as the carboniferous age.

Frightful Accident.

This morning between 10 and 11 o'clock a premature blast occurred at the C. & C. whereby John Cavanaugh, a miner, was seriously and perhaps fatally injured. The particulars are as follows:

John Cavanaugh, with his partner Denis Canly, had loaded a set of holes to the face of the drift on the 1650 level. Cavanaugh was engaged in putting the snuffs under and as he was snuffing the last hole the first prematurely exploded. It received the charge in the head and left side and was blown several feet. Canly who was back some distance in the drift ran to his assistance, and the injured miner was quickly brought to the surface and Dr. Harris called.

It was found that the man was frightfully injured. His head was a mass of holes and his left side was thickly punctured down to the knee. An examination by the doctor discovered that the left eye had been destroyed, two ribs broken, and the left shoulder terribly lacerated. On the left shoulder there were two cuts that penetrated a depth of five inches under the shoulder blade, while his side was perforated by fifty lesser wounds.

His recovery is very doubtful.—Virginia Chronicle.

Roll of Honor.

Following is the report of the Anderson School for the month ending March 3, 1893. Number of boys enrolled, 11; number of girls enrolled, 6. Total number enrolled, 17.

Scholarship—James Peckham, 95; James Shelby, 95; Arthur Peckham, 93; Frank Peterson, 94; Benton Sparks, 92; Ethel Peckham, 91; Clarence Morrill, 91; Alfred Peckham, 91.

Department—James Shelby, 99; Arthur Peckham, 96; Clarence Morrill, 96; Alfred Peckham, 96; Ethel Peckham, 95; James Peckham, 95; Frank Peterson, 94; Ethel Peckham, 91.

Church Notices.

Seventh Day Advent Church.—There will be services in the Advent Church this afternoon, Sabbath School and Bible Class at 1:30 o'clock and preaching at 2:30. The public is cordially invited.

Highest of all in Leavening Power.—Latest U. S. Gov't Report.

Royal Baking Powder

ABSOLUTELY PURE

"OTHELLO" TO-NIGHT.

"Kathleen Mavourneen" for the Matinee This Afternoon.

The Foots Company continued the production of satisfactory performances last evening. So much has been said about the troupe that it is hardly necessary to add further words of praise. The audience was not overly large, but what was lacking in size was made up in interest.

Mr. Foots announced from the stage that owing to the pathologicalness of the play "Camille," and believing it would be more appreciated, he has changed his program and will produce "Kathleen Mavourneen" at the matinee this afternoon. Mr. Foots stated that the price of admission for children would be 25 cents, but that children who are without the necessary admittance fee would be admitted free of charge.

"Othello, the Moor of Venice," Shakespeare's tragedy of love, hatred and jealousy, which is the strongest of Mr. Foots' pieces, will be played to-night, and the Opera House should be crowded as an appreciation of the excellence of the performance given by the company during the week. A treat is in store for all who attend.

The Bill Knocked Out.

Assembly bill No. 77 will not become a law. It was enrolled and taken to Speaker Bell for his signature, but he declined unless the enrolled bill stated that it was a copy of the original bill.

Lieutenant Governor Penzance declined to sign it under any circumstances. The bill cannot become a law and the deputies get their old salaries.—Appeal.

St. Patrick's Ball.

Company C, N. N. G., will give a grand ball on the night of the 17th inst. (St. Patrick's Day). The best music obtainable has been secured for the occasion. The price of admission will be \$1, not 50 cents, as erroneously published last evening.

Queer Actions of a Bride.

Andrew Parker and Mary Seidler, of Braddock, were to have been married at noon at St. Michael's Catholic church. The building was filled with friends and relatives, and the Rev. Raymond Weider stood at the altar with the contracting parties and their attendants ready to begin the ceremony.

Suddenly the assemblage was startled to see the bride step backward and refuse to take part in the ceremony, and while they were yet wondering the to be bride, without offering any explanation, turned and made her way alone to the basement of the church, where she took off her wedding gown and veil and attired herself in a street costume she had provided. As she came out of the basement smiling, it appeared triumphantly, and made her way down the steps to the street where she was followed by Parker. He stopped her and informed her that he had paid \$1.50 for a marriage license, and now that he was not to get the benefit of the license he proposed to have the \$1.50.

With a low courtesy Miss Seidler pulled out her purse and handed him a five dollar gold piece, and told him to take his \$1.50 out of it. Parker put the gold piece in his pocket. Miss Seidler persisted in her demand for \$3.50 change, and people began to gather around. Parker, losing control of himself, struck the young woman in the face and on the breast several times, and then hastily made his way through the crowd and disappeared.

It is supposed by many that Miss Seidler did as she did for the express purpose of mortifying Parker. The pair first met about fifteen months ago, and have been engaged for about four months.—McKeesport Times.

Raising Canary Birds.

In Germany the poorer classes are nearly all engaged in raising canaries. Several hundred thousand are shipped every year to all parts of the world. There is no industry like it in existence. The birds are strong and hardy and require very little attention; consequently among the peasantry every family has a aviary, which is a constant source of income, independent of the proceeds of their daily toil. The buyers for the New York houses make periodical trips through the country, the birds are brought and are seen on their way to America, where they quickly become treasured to their owners.—Pittsburg Record.

Tobacco Tarsa Smile Sometimes

When told that tobacco hurts them; their wives never do, because shut red nerves, weak eyes, chronic catarrh and lost manhood, tells the story. If your husband uses tobacco, you want him to quit, post yourself about No-to-bac, the wonderful, harmless, guaranteed tobacco habit cure, by sending for our little book titled: "Don't Tobacco Spit and Smoke Your Life Away," mailed free. Drug stores generally sell No-to-bac. THE STERLING REMEDY CO., Indiana Mineral Springs, Indiana.

When Baby was sick, we gave her Castoria. When she was a Child, she cried for Castoria. When she became Miss, she clung to Castoria. When she had Children, she gave them Castoria.

Deserves Attention.

If you have money to invest in Reno real estate, either in large or small amounts, the Reno Real Estate and Investment Company offers most particular inducements to you. By investing in its shares of stock you participate in its investments which are governed by its able and experienced Board of Trustees, consisting of Mr. C. T. Bender, Mr. Sol Levy, Mr. C. O. Powning, Mr. Geo. F. Turrittin and Mr. A. G. Fletcher. The principle object of the company is to purchase and improve centrally located business property in the city of Reno. Everyone is of one mind as to the desirability of such investments.

The company is incorporated with a capital of \$100,000, divided into 20,000 shares of the par value of five dollars each, and from its already large list of share holders there is every reason to believe that it is destined to become one of the most flourishing companies in the State. Of its 20,000 shares there have been 12,000 sold since August 1st.

Its shares are sold upon the monthly installment plan of ten cents per share, installments to range over a period of fifty months. In this way persons of moderate means are enabled to combine and participate in investments that usually only fall to the lot of the fortunate capitalist. Mr. F. M. Lee, the Secretary of the company, will be pleased to furnish any desired information.
